ALBIT®

Albit is a liquid paste
to improve plant growth
and stress tolerance
on potatoes

**Summary of
Colorado State University Study**

**Nature & Technology
for Higher Yields**

Benefits of Adding Albit In-Furrow During Planting...

- Stimulates Sprouting
- Accelerates Root Development
- Increase Sprout Emergence (Fig. 1)
- Enhances Stem Numbers from 2 to 3 per plant

Albit Enhances Sprout Emergence of Canela Russet

Fig. 1

Albit Technology

A natural microbial biopolymer poly- β -hydroxybutyric acid (PHB)

Albit's Natural Elements Include...

a hydrolyzed biomass of soil bacteria with

- Bacillus megaterium
- Pseudomonas aureofaciens

Amended with plant nutrients

- ~Nitrogen
- ~Phosphorus
- ~Potassium
- ~Magnesium
- ~Sulphur

Albit is an innovative product of biological origin for the protection of agricultural plants against natural and chemical stresses.

CONTROL

ALBIT In-Furrow

Benefits of Adding Albit In-Furrow & Foliar Sprays...

- Enhances Tuber Initiation & Set from 6 to 8 per Plant
- Tuber Bulking Increases by 5% (Fig 2)
- Generates Strong Root System for Plant Health
- Stimulates Root Development & Mineral Absorption
- Promotes Growth & Vigor
- Improves Stress Tolerance
- Increases Tuber Yield & Size Distribution 6-9%
- No External Tuber Defects whereas Control had 0.4% External Defects
