

WHEAT SPRAY PROGRAM

Burn Down: Add **Wet-Able®**
32 oz/100 gal of water to Herbicides to
Improve Efficacy

Powered by **Trans-Sieve and Protection Technology®**

Tillering Stage: **Albit®** .4 to .6 oz/Ac with Herbicide Spray for
Reduced Herbicide Stress Add **Wet-Able®** 24 oz/100 gal of water to
Improve Efficacy

or **Reli-Able®** .6 to .8 oz/Ac No need to add an Adjuvant or AMS

Powered by **Trans-Sieve and Protection Technology®**

Seed Treatment : **Albit®** & **Soil-Able®**
-OR-
Grow-Able® DS

Boot Stage: **Reli-Able®** .8 oz/Ac with Fungicide
No need to add an Adjuvant

Powered by **Trans-Sieve and Protection Technology**

At Planting

At Tillering with Herbicide

At Boot/Flag Leaf

Wheat & Small Grains	Seed Treatment: Albit 3.5 oz/ton -OR- Grow-Able DS	Albit <u>0.4 to 0.6 oz/Ac</u> (if using two POST applications then <u>0.2 to 0.3 oz/Ac</u> each application) -OR- Reli-Able <u>0.6 to 0.8 oz/Ac</u> (if two POST applications then <u>0.3 to 0.4 oz/Ac</u> each application)	Reli-Able <u>0.8 oz/Ac</u>
	<i>*Add Biological Inoculant</i>	<i>* May add Micronutrients, Testing of Crop Response Needed</i>	<i>* May add Micronutrients and/or Fungicides & Insecticides</i>

IMPROVE YIELD ON WHEAT

Plant Growth

ALBIT[®]

Albit 9-6-4 is an innovative product of biological origin for the protection of agricultural plants against natural and chemical stresses. At the core is a powerful biopolymer, poly- β -hydroxybutyrate (PHB), paired with 20% hydrolyzed biomass of non-living beneficial soil bacteria (*Bacillus megaterium* and *Pseudomonas aureofaciens*). This advanced formulation improves plant resilience during key phenological stages

RELI-ABLE[®]

Powered by Trans-Sieve & Protection Technology[®]

Reli-Able 2-7-5 is a next-generation soluble liquid fertilizer and plant growth promoter designed to elevate crop performance under both biotic and abiotic stress conditions. Powered by our innovative & exclusive Trans-Sieve & Protection Technology. Reli-Able[®] eliminates the need for additional adjuvants in the spray tank, simplifying application while maximizing effectiveness.

GROW-ABLE[®] DS

Powered by Trans-Sieve & Protection Technology[®]

Benefits On Wheat

- Promotes Uniform Germination
- Assists with the Critical Vegetative Tillering Stage
- Stimulates Lateral and Feeder Root Development
- Promotes Plant Vigor, by Increasing Nutrient and Mineral Absorption
- Stimulates Phosphate Solubilizing Microorganisms
- Neutralizes Chemical Crop Stunting (Herbicide drag)
- Decreases Stress Caused by Harsh Climate Conditions
- Top-Performing Spray Program for ROI and Yield

Adjuvants

WET-ABLE[®]

Powered by Trans-Sieve and Protection Technology[®]

A HIGH SURFACTANT

- Enhances the efficacy of agricultural crop protection products, nutrients, and plant growth regulators.
- Encapsulates herbicides, insecticides or fungicides from UV decomposition
- Contains film forming properties that stay on foliage with persistence.
- Lengthens the residual benefits of all nutrient and chemical treatments.

SOIL-ABLE[®]

SOIL PENETRANT ENHANCER & PLANT GROWTH PROMOTER

- Improves movement of soil applied pesticide active ingredients & nutrients throughout the soil profile thus increasing control.
- Increases the efficacy and lengthens the residual benefit of pesticide active ingredients.
- Enhances water movement into the soil.
- Results in the increase of microbial activity.
- Increases oxygen levels in the soil profile together with the microbial activity, improving the nutrient uptake and root development.

- Dry seed treatment built from our proprietary and proven Reli-Able[®] and Trans-Sieve & Protection Technology[®]
- No need to add additional seed lubricants
- Designed to support faster crop establishment, improved germination, nutrient uptake, and better early plant health
- May help reduce the negative effects of early season stress
